
Our Commitment to Sustainability

Argentum Medical (DBA Bravida Medical) is committed to sustainability and reduction GHG emissions. We recognize the impact we have on the environment and understand that we must protect it. While striving for continuous improvement, we aim to lessen our impact on the local and global environment by implementing the initiatives below:

Reduce Greenhouse Gas Emissions:

- Implement energy efficient technologies that reduce energy usage.
- Implement electronic communication strategies to reduce automobile and airline travel.
- Efficient utilization of company vehicles to reduce CO2 emissions.
- Implement information technology strategies to reduce the use of paper and printing.

Responsible Supply Chain:

- Implement low-carbon-footprint packaging designs with suppliers to reduce the amount of packaging materials used.
- Work with suppliers to provide bulk shipments using the most efficient methods of transportation.

Waste Management:

- Implement the use of low-carbon-footprint and reusable containers internally and between suppliers and customers.
- Wooden shipping pallets are reused or recycled whenever possible.
- Paper and corrugated waste is recycled.
- Recycling and/or responsible disposal of IT equipment.

Water Conservation:

- Implement strategies that reduce the water used in the production of products and facilities usage.

Implement Sustainable Innovation Into:

- Computing and IT infrastructure.
- Design and development process for new products and product changes.
- Equipment Implementation process.
- Management Review process.
- Purchasing Controls process.
