Anasept Testimonial

Hi, hear this story please. This is a child (my sister's kid) of 10-year-old age male, with trauma to the face and right elbow. He is otherwise normal kid. While he ride a bicycle near his home suddenly stuck by a car, and fall down, causing left facial epidermal laceration and looks like 1st degree burn, semi circular around 6*8 cm. and elbow abrasion. Upon using 2 technologies (Anasept solution and twice times xeroform petrolatum bismuth dressing and 3 days apart in between the dressings) there was a dramatic improvement. Th attached files shows pictures before and after Anasept application.

The last picture shows good improvement,

Dr.Botan Al-Sarraj

Day 1: Before Any Treatment

After Treatment Started with Anasept Cleanser and
